

Technical Report

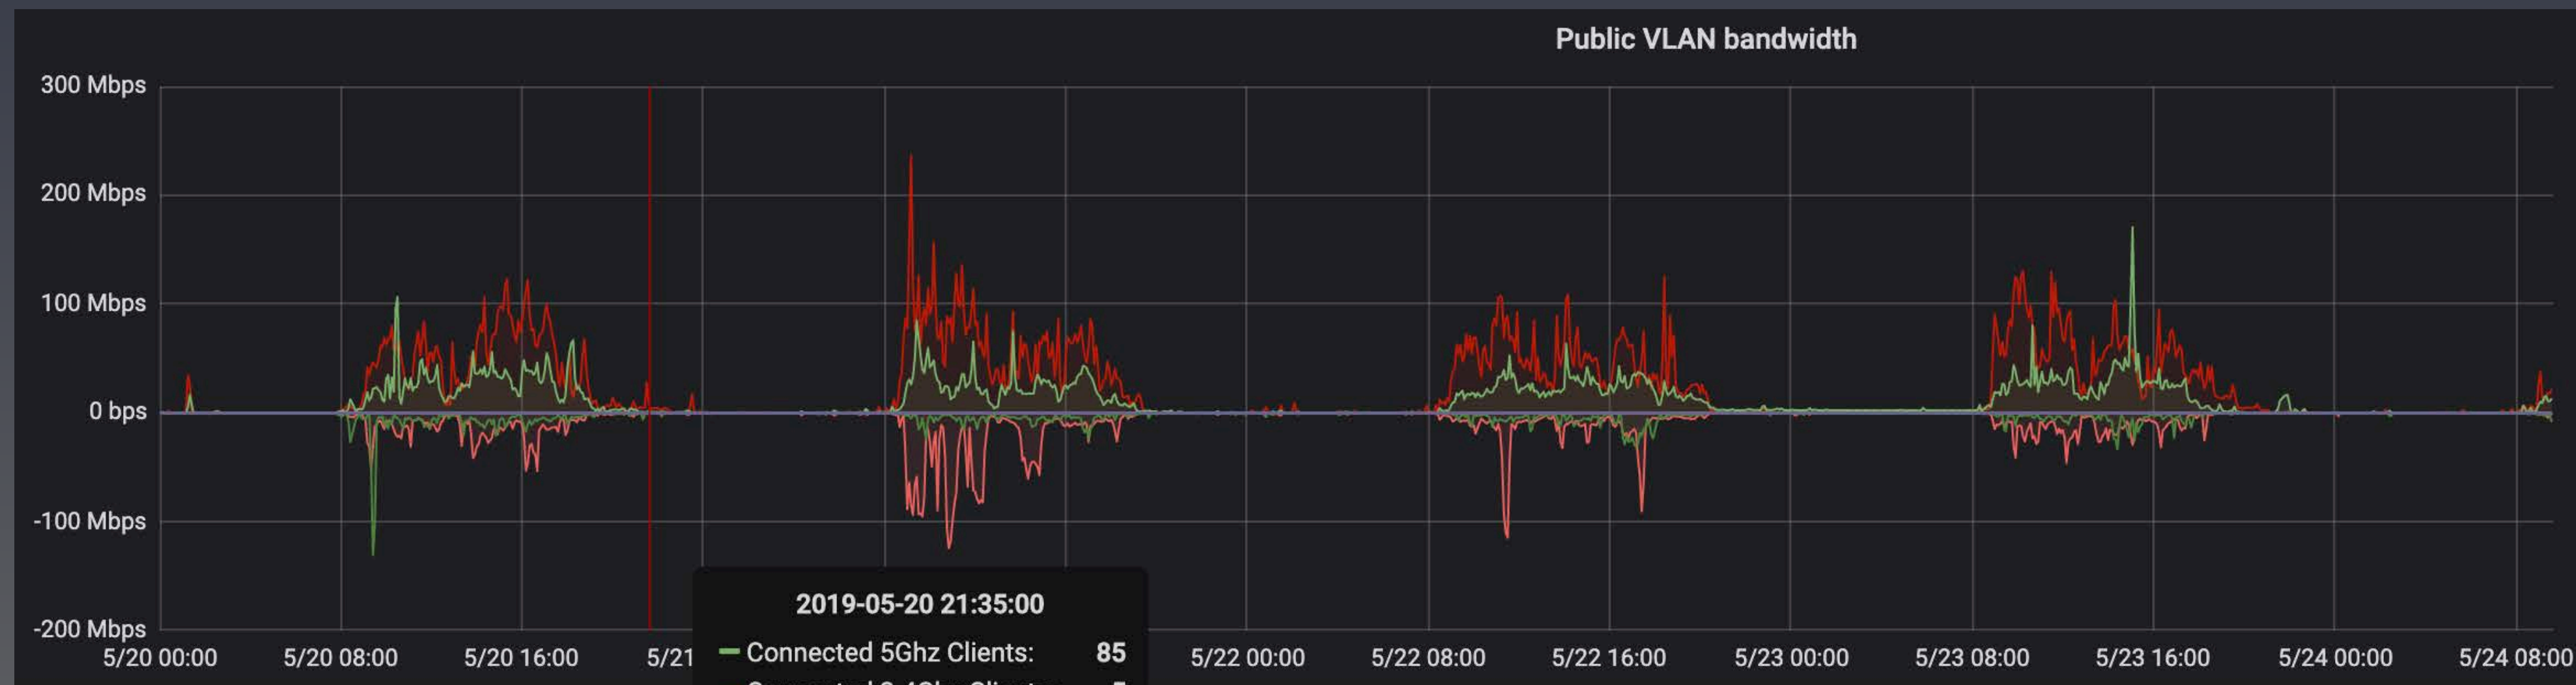

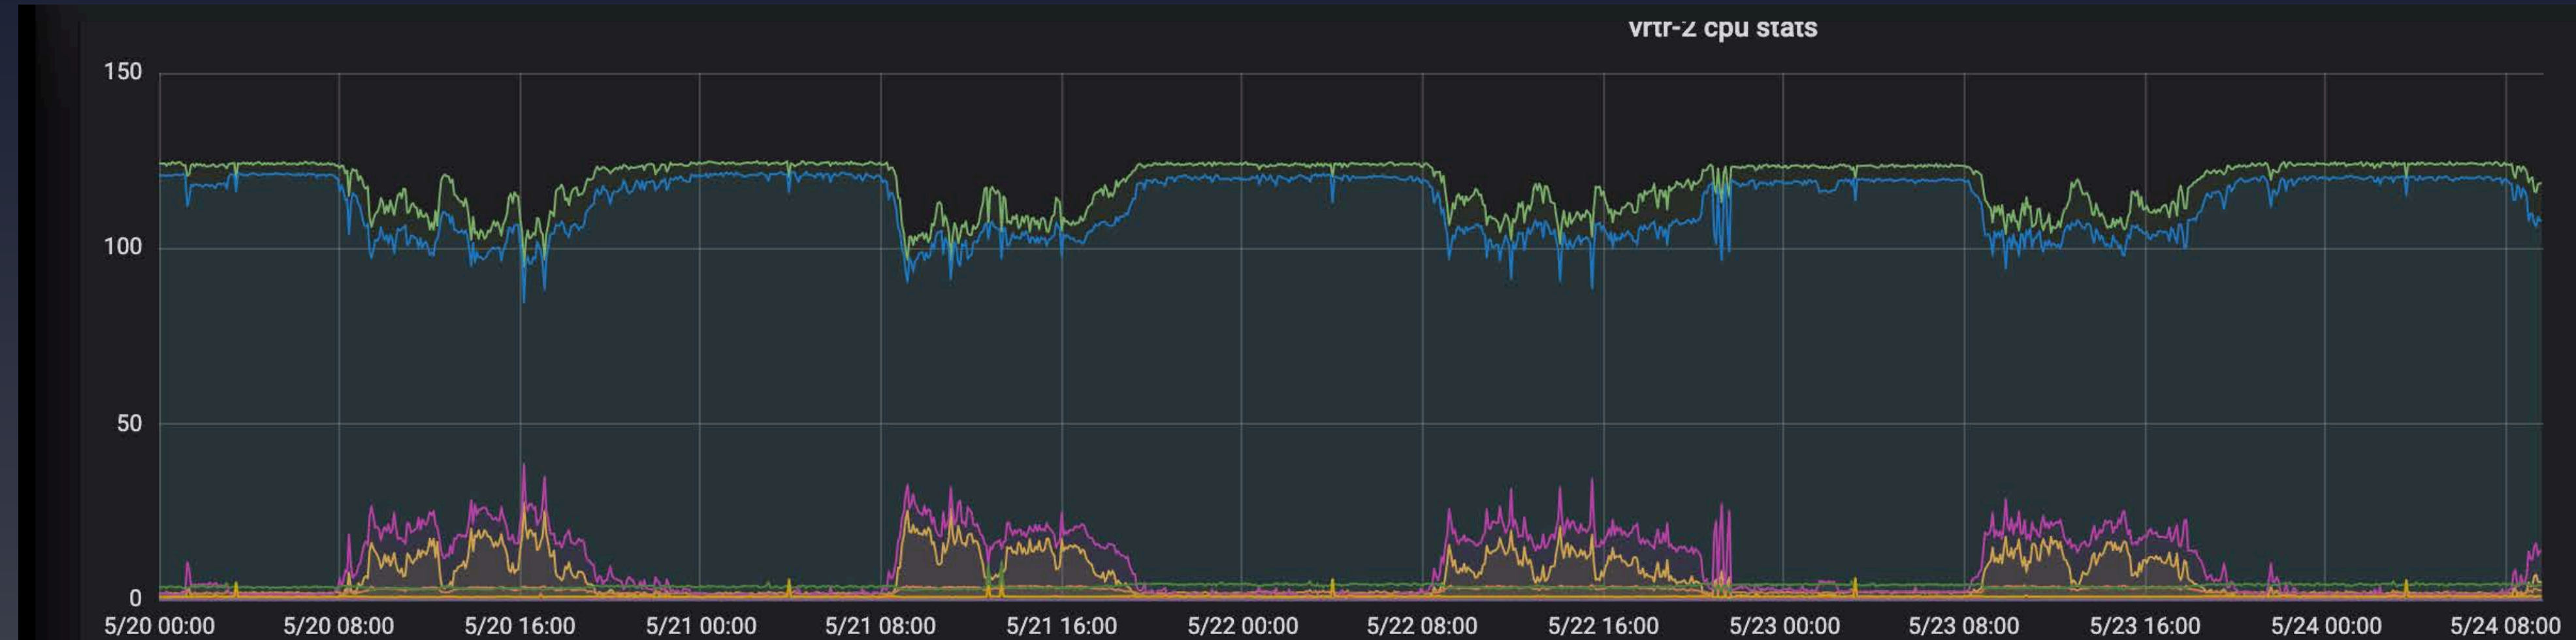

RIPE 78 - Reykjavik

RPKI now at a meeting near you!

- RPKI on the meeting network
- We're dropping invalids
- Using BIRD Virtual router
- Using the RIPE Validator
- Running on VMware
- 2 cores from a Xeon D1528 (1.9Ghz) (pretty slow CPU)

RPKI

Steal our config!

- RIPE meeting BIRD (2.0.4) config with RPKI:
- <https://gist.github.com/mschep/695413d3ba47b5d5c5ce91f096793c19>
- good luck copying that...
- download this presentation from <https://ripe78.ripe.net>

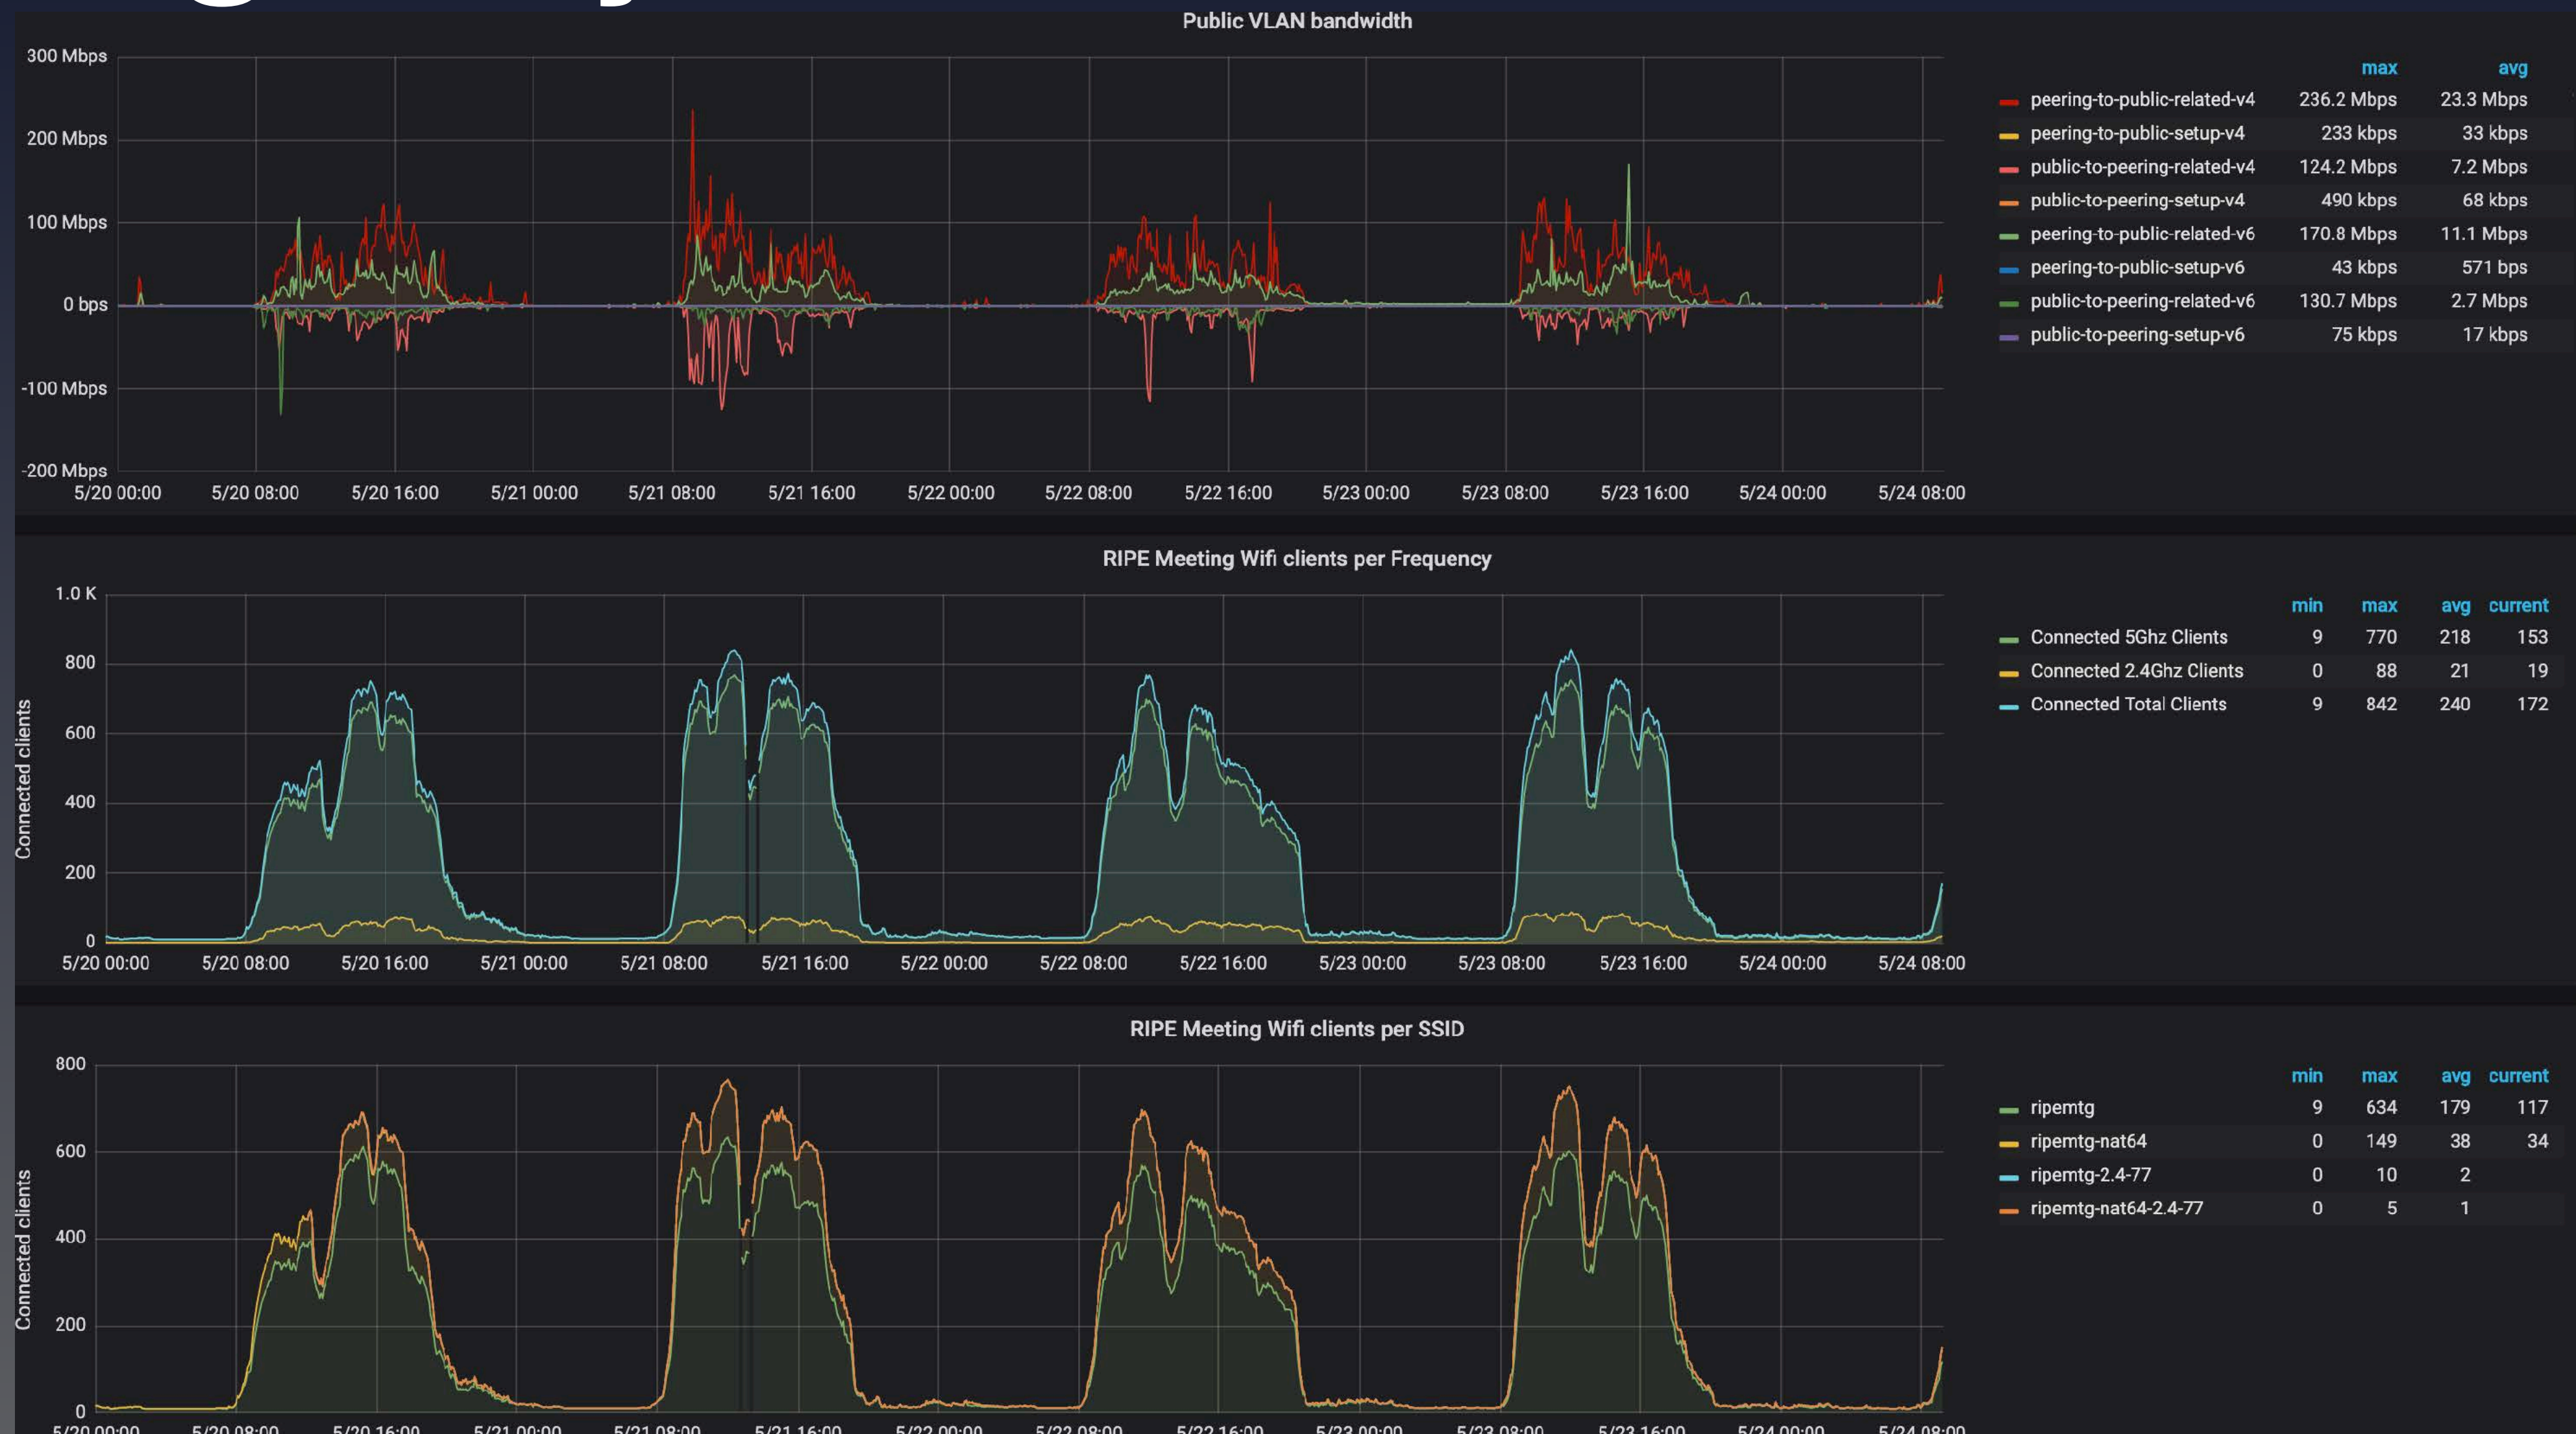

I've got issues...

- Shipment delayed until 2PM Friday
- Water in the power blocks
- Rebooting tricastors (twice)
- Rebooting windows steno laptops
- Even DSAN clickers die
