IPv6 on Mobile networks BCOP

Helping mobile operators

More and more mobile operators are moving to or looking at IPv6

- Lack of guidance
- RIPE NCC ER Team identified the issue some time ago
- Contacted a series of operators to discuss issues, challenges, showstoppers

Topics/Issues

- Preparation work
 - Subnet size
- Vendor support
- Single or multiple APN
- Transition mechanism
- Billing support
- Roaming

Next steps

- Talk to more operators to identify smaller issues
 - If you're interested in participating, contact us
- Have a draft document for review
